Basement Solutions Vancouver - We are a full service plumbing company. Do you have water in your basement? We are your basement and crawl space specialists. A wet basement can be one of the most damaging and stressful events to happen in your home, causing inconvenience and costly repairs to be made. Homes in our Lower Mainland region should be protected from the constant damaging effects to buildings caused by excessive rainfalls. **Basement Solutions Vancouver** provides you with the protection necessary to keep today's basements dry in the long term, with proven air gap technology and best quality materials built-in.

No dig trenchless water & sewer Lines

We keep your basement dry!

You can't go wrong with **Basement Solutions Vancouver** as long as rain continues to fall in the lower mainland! Our systems do not allow any water getting past the dimpled membrane to fall freely to the drain tile through the air gap section, keeping water away from your foundation and preventing hydrostatic water pressure against your walls. We are trenchless - no digging - water and sewer pipe line replacement specialists. Our Plumbers are specially trained in our own patented Pipe Genie, Pipe Bursting Equipment.

Our plumbers are experts when it comes to repairing or replacing your plumbing fixtures. We can fix plugged toilets, drains, replace shower head and pipes, stop leaking or dripping taps and faucets.
